

Note on Proposed Works:

The reasons for the works are:

T2 - Safety - To clear the streetlight to make the area more illuminated.

T4 - Safety - There is Ash dieback, fungus, decay, and deadwood present. This tree is a safety risk and could cause harm if it were to fail. It is foreseeable that the tree will fail.

T6 - Safety - To crown raise the tree over the highway and footpath to prevent injury to people and damage to vehicles. Removing deadwood will remove a risk of it falling on people.
