COMMENTS:

We would like to object to this application based on the light pollution this sign has already caused. We have already provided photographs of the light emitted from this screen and the impact on the neighbouring properties can be seen from this as the sign was in place and switched on prior to Christmas.

The advertising board is directly facing the road entrance into the store and is distracting to drivers entering and exiting the store car park as well as those driving down Bramshill Close especially as the images are changing and moving.
