COMMENTS:

Having lived in Wokingham since 1973, I am constantly disappointed in recent years to see the amount of development and its negative impact on the local community.

Using this small track as the main access is completely unsuitable. The school children who use this as a walkway and cycleway will be put in danger, the wildlife will be massively compromised and there will be noise and light pollution. Surely the building of the NDR was to alleviate the pressure of traffic at Forest Road/Emmbrook areas.. Why is this road required as well and how can it be justified given the wholly negative impact it will have ?
