

ATTACHMENT B : SCHEDULE OF WORK

Danesfield, Wiltshire Road, Wokingham, Rg40 1QU

Tag 2237; Lime.

Reduce canopy by 4 metres in height and 2 metres in width.

Crown thin remainder by 20%. Remove deadwood.

For your convenience, please see extracts from the Arboricultural Report – Attachment C – below:-

*"Tag 2237; Lime. Size; Large. Age; Mature.
Base; Satisfactory. Good buttress roots. No evidence of fungal brackets or decay.
Stem; Twin co-dominant stems from 1 metre.
Satisfactory.
Unions; Main union at 1 metre is tight albeit indicative of the species.
Potential for inclusion. No change in condition from previous survey.
Further unions are satisfactory.
Branches; Satisfactory although somewhat dense. Some deadwood present.
Leaves; Good quantity and quality.
Note; This tree is subject to a TPO (ref; 882/1997). In 2020 a request was made to have the tree reduced by 4 metres in height and 2 metres in width to alleviate the concerns of inclusion in the main union. Since this date the crown has become dense again causing concern at the main union.
Recommended work; Reduce canopy by 4 metres in height and 2 metres in width. Crown thin remainder by 20%. Remove deadwood.
A TPO work application to WBC will be required.
Priority; Within 3 months."*

Tag 2252; Hornbeam.

Prune to clear the light by 1 metre.

For your convenience, please see extracts from the Arboricultural Report – Attachment C – below:-

*"Tag 2252; Hornbeam. Size; Small. Age; Semi-mature.
Leaning tree suppressed by adjacent dominant tree.
Base; Satisfactory.
Stem; Satisfactory.
Unions; Satisfactory.
Branches; Satisfactory. Some low branches encroach onto the light.
Leaves; Good quantity and quality.
Recommended work; Prune to clear the light by 1 metre.
Priority; Within 6 months."*
