COMMENTS:

1. The application is wholly inappropriate. To develop the land would change the countryside feel that you get when you enter the land..
2. Edneys Hill is predominantly rural in character and used , despite having no footpaths, by walkers and children recreationally.
3. The land is very narrow and already overused by vehicles which have difficulty in passing each other in several places.
4. Several planning applications and appeals seeking to develop this site have been made in the past and all have been rejected - with good reason.
