Re: Applemore Cottage Biodiversity.

The planning application is purely for a dropped kerb to be installed at Applemore Cottage.

Planning application was approved (F/2012/1298) for the construction of a Garage, access, driveway and parking. All these have long been completed and only a dropped kerb remains.

This is to be quoted for and installed by Wokingham Council approved contractors and will have no detrimental effect on anything.

It is therefore assumed that this application has zero impact on Biodiversity.

Martin James
