COMMENTS:

I totally agree with the comments of both Mrs Vanessa James and Mr and Mrs Hogg.

In addition this is a totally inappropriate development to be in the middle of the short road joining two countryside villages. There is a pavement all the way which is presently enjoyed by walkers. As well as traffic , the road is also used by cyclists. This development

would pollute the area, preventing any health benefits to walkers and cyclists. It would cause extensive traffic jams and therefore more pollution from exhausts. Articulated lorries, with their large blind spots, turning into the site on this narrow road present a grave

danger to vulnerable road users such as pedestrians and cyclists. I can't understand how the development was even considered.
