

# Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

## When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

## 1. Submission details

### 1.1 Date

For example, 3/11/2023

08/12/2025

### 1.2 Planning application reference number

243229

### 1.3 Local planning authority (LPA)

Wokingham Borough Council

### 1.4 Development site address

If the site does not have an address, enter the OS grid reference.

Victoria Nurseries, Wargrave, Wokingham, RG10 8AG

### 1.5 Describe the development

Tell us about the proposed development and any changes of use (250 words).

The consented scheme is to construct eight residential dwellings with associated hard and soft landscaping, requiring the demolition of the existing buildings and clearance of some vegetation.

## 2. Developer details

### 2.1 Applicant name

Jon Furneaux

### 2.2 Company name

Palatine Homes Limited

### 2.3 Address

**4. Biodiversity net gain strategy****4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?**

Yes  
 No

**4.2 If no, what earlier date did you agree with the LPA?**

N/A

**4.3 How have you met the guidance on ‘what counts towards your BNG’?**

[Find out what you can count towards a development’s BNG](#)

Habitats are being created on-site and off-site habitat units are being purchased.

**4.4 How will you avoid or minimise impacts to habitats?**

Tell us about the steps you’ve taken on site, including to avoid or minimise the impact on irreplaceable habitats.

There are no irreplaceable habitats on-site. In order to protect any adjacent vegetation, tree protection fencing will be installed, as necessary. To avoid any accidental damage, any overhanging branches should be pruned back to suitable live growth points. All works should be undertaken by a suitably qualified and experienced specialist contractor and should conform to current industry best practice, i.e. BS 3998: 2010 ‘Tree Work - Recommendations’.

**4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?**

This includes other specified strategies if you do not have a local nature recovery strategy.

- Yes
- No

**4.6 How will you achieve the target net gain percentage?**

- On-site
- Off-site
- Both

**4.7 Are any of your on-site enhancements considered ‘significant’?**

[Find out what counts as a significant on-site enhancement.](#)

- Yes
- No

**4.8 If yes, tell us about the significant on-site enhancements**

Include the appropriate planning condition or how you’ve secured the habitat.

N/A

**4.9 How many off-site biodiversity units do you need to meet 10% net gain?**

0.58

**4.10 Explain why you’re using off-site biodiversity units**

Only answer this question if you’re planning to use off-site biodiversity units (250 words).

In accordance with the current user guide any new planting within a private garden has been recorded under the ‘Vegetated Garden’ habitat type. As such no on-site enhancements could be provided.

#### **4.11 Explain why you're planning to use statutory biodiversity credits**

Only answer this question if you're planning to use statutory biodiversity credits (250 words).
