

2.4 TREES APPRAISAL

|                                        |   |
|----------------------------------------|---|
| Number of individual trees surveyed:   | 3 |
| Number of tree groups surveyed:        | 0 |
| Number of category 'A' trees / groups: | 0 |
| Number of category 'B' trees / groups: | 2 |
| Number of category 'C' trees / groups: | 1 |
| Number of category 'U' trees / groups: | 0 |

Figure 3 - Tree quality summary

T001 (Ash) has epicormic shoots growing on the lower trunk and localised deadwood in crown. Both symptoms are indicative of Ash Dieback Disease. T001 has an Ash Dieback Infection Level of 2 which means that 25% to 50% of the canopy is affected by disease. The tree has been given a category 'C' grade which reflects its reduced life expectancy.

Two trees - T002 & T003 are mature specimen Oak trees. The canopies of both trees are retrenching. Bud distribution is normal. The Oaks have been given a category 'B' grade as a reflection of their moderate to high amenity value and adequate health.

All trees are growing to the rear of the property and set well back from the public highway. Their upper canopies are visible as a backdrop to houses in views from Denrose Close and neighbouring Clevedon Drive.
