

PROPOSED GARAGE – 3D VOLUME CALCULATION

VOLUME CALCULATION

The garage is a simple rectangular building with a consistent height.

Formula:

Volume = Length × Width × Height

Where:

Length (L) = 9.00 m

Width (W) = 6.00 m

Height (H) = 3.20 m (eaves height)

Calculation:

Volume = 9.00 m × 6.00 m × 3.20 m

= 54.00 m² × 3.20 m

= 172.80 m³

TOTAL VOLUME = 172.80 m³

Notes: All dimensions are externally measured.
