COMMENTS:

I reside in the residential property that is next to the Site address.

I fully support the application for the new Site access / internal surfaced track way - it will facilitate traffic flow in/out of the Site, reduce congestion on Wargrave Rd, reducing idling traffic outside of the Site address / my residential property, and enhance the Site property further i.e. the access / track way will be sighted on previously poorly maintained, unsightly land.

The application will provide further, needed, enhancement to the Site property, and also the surrounding infrastructure

Yours, Graeham (Sampson)
