

This architectural elevation drawing depicts a long, symmetrical building, likely a school or institutional structure. The building features a central entrance with a small portico supported by columns. The roof is gabled, and a small cupola is situated at the peak. The facade is characterized by a series of windows, including large double doors at the entrance and smaller windows along the sides. The drawing is a line art representation, showing the building's form and structural details.

This architectural elevation drawing shows a long, single-story building with a symmetrical design. The central entrance is marked by a small portico with a triangular pediment. Above the roofline, a small cupola with a pyramidal roof is visible. The building features a series of windows and doors along its length, with a central section that appears to be a recessed or covered walkway. The drawing is a black and white line art representation, showing the building's form and structural details.

Colour : White

This architectural elevation drawing shows a long, two-story building with a gabled roof. The building features a series of windows and doors along its facade. On the left side, there is a small gabled structure. The roof has a small dormer on the left and a chimney on the right. The building is divided into several sections by vertical lines, suggesting different units or wings. The drawing is a line art representation with no shading or color.
