3. Determine before submitting a tender, the extent of preparation: ensure soil of all planting beds is graded to

[illegible]

1. All planting must be carried out in accordance to the

- degrees of flexibility, stability, and reduced time-to-market for market requirements changes. The latter is the main reason for the success of the agile approach. The agile approach is based on the following characteristics:
1. **Iterative and incremental development** – The agile approach is a continuous, incremental process. It does not require a complete specification of the requirements at the beginning of the project. Instead, the requirements are refined and updated as the project progresses. This allows the team to respond to changes in requirements quickly and effectively.
 2. **Self-organizing teams** – Agile teams are self-organizing and cross-functional. They are empowered to make decisions and take ownership of their work. This promotes collaboration and communication within the team.
 3. **Collaboration and communication** – Agile teams work closely with stakeholders throughout the project. They use frequent communication to ensure that everyone is on the same page and to address any issues or concerns as they arise.
 4. **Small, frequent releases** – Agile teams release small, functional increments of the product frequently. This allows them to get feedback from users early and often, and to make adjustments as needed.
 5. **Flexibility and adaptability** – Agile teams are flexible and adaptable. They can respond quickly to changes in requirements or market conditions. This is a key advantage of the agile approach.
- The agile approach is a powerful tool for managing complex projects. It allows teams to deliver high-quality products quickly and efficiently, while also maintaining flexibility and adaptability throughout the project lifecycle.

2. Method

- These trends, which are consistent across the board, can be partly due to the introduction of small companies. All of the small and medium-sized companies included in the study were founded after 1990, and their owners are likely to have been trained in the use of modern management practices. In addition, the small and medium-sized companies included in the study may have been able to attract better management talent than the larger companies. Indeed, the small and medium-sized companies included in the study may have been able to attract better management talent than the larger companies. Indeed, the small and medium-sized companies included in the study may have been able to attract better management talent than the larger companies.
