

REASON FOR PROPOSED WORKS:

1. Firstly, there is a dead branch, as indicated in photo 2, that is fairly large and could fall directly onto the ground or onto us so is causing a hazard.

(ii) Secondly the tree blocks a great deal of light from the garden and back of the house when in leaf. It has also destroyed the lawn at the top end of the garden due to heavy rainfall. We have therefore had to replace the lawn with artificial grass to help rectify the situation.

(iii) I don't believe the tree is deceased as it appears to withstand strong winds and continues to grow vigorously.
