COMMENTS:

It is well known that more homes are needed, and I fully understand that. However, it is absurd to continue destroying natural habitats for deer, foxes, birds, and other wildlife. Local communities thoroughly enjoy the surrounding nature; for many of us, it is one of the main reasons we choose to live here.

Yet the council continues to take away these green spaces without properly listening to residents' concerns. It feels as though development is being prioritised over the wishes of the community. I urge the council to reconsider its approach and stop approving further developments for the time being.

Instead, focus on occupying the homes that have already been built but remain empty, and allow existing construction projects to be completed before starting new ones. Many residents are already frustrated by the current level of development, and further building will only increase those concerns.

Everyone agrees that more housing is needed, but nobody wants to be the generation that replaces a woodland full of deer, foxes, and birds with another housing estate named after the very wildlife that has been driven away.

Once these green spaces are gone, they cannot easily be replaced
