

252762 West Court Land Park Lane Finchampstead Wokingham RG40 4QF

Prior approval submission for a proposed installation of electronic communications apparatus comprising a 29.1m high slimline lattice mobile phone mast, 3 no. aerials, 2 no. transmission dishes, 1 no. GPS aerial, radio equipment housing and development ancillary to radio equipment housing.

I have reviewed the above application which is an area with archaeological potential.

Before I can fully assess the need for any archaeological mitigation, I need some clarification from the applicant as to the extent and depths of any ground works required for this development.

Please can you ask for clear details of the ground impacts expected, or suggest that they/their consultant/agent contacts me directly.

Many thanks
