COMMENTS:

My mother is a resident at Warren Lodge, having spent years living in the local area. I am extremely concerned there could be substantial disturbance to residents of Warren Lodge with the potential for increased and unpredictable noise from the site and destruction of the current quiet and unspoilt rural environment which is so important to the care home residents.

There are four pitches on this site, two are not permanent meaning there will be frequent movement of multiple vehicles with caravans by the temporary residents in addition to those vehicles used by the permanent site residents. The increased traffic in and out of the proposed entrance on Warren Lane, directly next to the Care Home, could impede the 24hr access required by the care home for ambulances, doctors, staff and visitors.

I understand the need to provide Gypsy and Traveller sites but Finchampstead already has a disproportionate percentage of the entire borough's provision.

This site, in a rural area, pure "greenfield", would harm the local environment, have a detrimental effect on the residents of the care home and is not suitable for a development of this type.
