COMMENTS:

The current infrastructure in place is totally inadequate.
The local doctors surgeries are already too busy. It is extremely difficult to get an appointment or even speak to anyone on the phone to be able to arrange an appointment.
The roads are already busy and cannot cope with anymore traffic which queues outside our road most mornings. The high volume of traffic passing throughout the day is already a danger for people using the local nursery, shops and amenities which have no or limited parking. The increase in traffic will further increase the amount of air and noise pollution in the area. There is plenty of wildlife which reside in the proposed area and this would impact them significantly. The water pressure in the area is already poor and this would cause further problems.
The AWE is also situated in close proximity.
