COMMENTS:

The tacky and grey design of this development is totally jarring and will be eyesore in the centre of the village, The house design of being grey and modern will ruin the character of the village being in such a central location. These houses need to be varied and classic not urban high density and modern .

Also the drainage is not up to date given he environment agencies latest report on Hurst being low lying and already prone to flooding each winter . The drainage design in not current given this report .

The houses are right next to the main road though the village , again not in keeping with the rest of the village. they need to be set back . This development needs serious rethink fr the whole layout and design before approval
