LEGEND

Site boundary

Potential View

No potential View

Notes:

The viewshed analysis has been based on a max. building height of 9m and has used a central point within the development boundary. The viewer height was set at 1.6m high.

The analysis is based on surface topography only and does not take account of visual barriers in the form of vegetation, buildings or other manmade elements.

GREENLANDSCAPE
STUDIO

Green Landscape Studio Limited - The Lakeside Centre, Lakeside Country Park, Wide Lane, Eastleigh, Hampshire - Telephone 01276 450039 - www.gl-studio.co.uk
This drawing and the works designed are the copyright of Green Landscape Studio Ltd and may not be reproduced or amended without written permission. No liability will be accepted for soundings made by other services.

Legend

- ①

Retention of existing landscape structure, particularly around the site boundary. Internal vegetation should be retained where feasible to do so.
- ②

Veteran tree to form a focal point within the open space, creating a visual link to the church spire, located to the north of the site.
- ③

Existing vegetation around the site boundary should be supplemented to create a strong feature. Additional planting should be native and contain 50% evergreen species.
- ④

Inclusion of buffer planting to the northern boundary. Species should be native in the form of hedgerow and tree planting. Hedgerow planting should contain at least 50% evergreen species.
- ⑤

Sufficient space should be allowed for tree planting within the residential development to reflect the wooded character of the surroundings and aid with blending the built form with the surrounding landscape.
- ⑥

Footpath links should be included within the site connecting to the wider landscape to create sustainable connections to local facilities and the existing PRoW network.
- ⑦

Views of the Church spire from the wider landscape should be retained through the site, this will require careful consideration of development along the eastern side of the site.
- ⑧

Dwellings should be offset from Reading Road and Church Lane to minimise built form immediately adjacent to the site boundary, this will minimise visibility of built form, as well as retained the wooded character (particularly associated with Church Lane).
- ⑨

Vehicular access proposed off Reading Road only.
- ⑩

POS should be located on the eastern side of the site, to create a softer transition to the adjacent countryside.
- ⑪

SuDS basins and swales are to be integrated into the open space, creating spaces for biodiversity and visual amenity.
