COMMENTS:

Live directly opposite and went to meeting. Had good conversation about builder disruption and noise = especially as child studying for exams in timeframe. Not ideal to have building site so close. See there is reference to a work construction measure being applied in planning docs. Can we please have site of this realisation and hours of build? Also can we ensure all building trucks, equipment, deliveries go to back to the site as this building is near to a dangerous blind corner and big trucks outside will cause a hazard to the road in relation to this corner but also to access generally across use but also directly to my entrance into and out of my house. See and discussed with owners no plans for direct lights at front of any shinning security ones. These shine through my house so please ensure this happens.
