COMMENTS:

I am not sure on this. I have put a call in to church contact to understand this one. Would have waited before put this in BUT I need to travel before consultation ends so had to put this here. When I met with church team they said new facility just for church use and small numbers (seen this has gone up from initial proposal) but there are a few small lines in planning proposal and statement that mentions local community place and uses off peak. The team had advised previously all for their use only. Any further use would have high impact on the road and residents - especially if events allowed to happen there other than the more quiet church services and to stated limit of 4 max. It is a highly residential road and large noisy gatherings and use are simply a no go surely and unfair to residents already living here with families. As I say I have put a call in and spoke to Giles Bedford who said to his knowledge still just for church use but as I say there is a bit in documents that may suggest differently but they are worded in unsure way for me to determine. I do object to any sort of large community noise use as it would have major impact on residents living and well being with light, noise, car/people volumes and at unsocial hours but as I say I am not sure I am reading correctly.
