COMMENTS:

This is yet another "thinly veiled "re- application to extend the pub (which has already been over developed for the site) to change its use to a hotel status and re position the entrance closer to a blind bend . I suggest the primary intention is to develop the land in the fields behind . The new "proposed" entrance would open up access to join the fields behind where mature Oak Trees were sadly cut down to make way for this road in anticipation of success with their application. Barkham Road traffic has increased substantially due to ever increasing housing .The speed limit is very seldom adhered too so to introduce an Entrance/Exit so close to a blind bend/brow of a hill is beyond belief.
I object most strongly to this application.
