COMMENTS:

This is not brownfield land, it's farming land. Why are we even considering building on farming land? Isn't there a concern about future food security?

As for the proposed school everyone knows that pupil numbers has dropped and is forecast to continue dropping, hence the council lowering the PAN for 8 primary schools. We all know that the proposed new school is not a new school but so Lambs Lane Primary can move into it so allowing their current building to be developed. This also applied to the supposed new doctors surgery, everyone knows it will be occupied by Swallowfield Surgery so that their current site can be developed.

Also what's the point of the AWE having an evacuation zone in place if we allow even more housing to be built?

Also with the proposed Halls Farm development, which is HUGE, why are we even considering this proposal? Absolutely no plan regarding the extra traffic etc this will all cause.
