COMMENTS:
As the club is in the Thames Valley Nature reserve, any additional floor would alter the open feel of the area and add to the sense that the reserve is being diminished.

As for the environmental requirements, they should be enforced especially in the nature reserve and where the water levels are precious. The should not be loosen for this unwanted project, and because they would lead to speculation of corruption.

Furthermore, I hope it will be rejected as the planning application was submitted against the wishes of the club members.
