COMMENTS:

What steps will the council be taking to ensure the commercial business remains within the operating parameters outlined in the application? The main concern being around parking at the junction and an increase in commercial non-residents into a residential area.

Is there visibility of the 'significant' social and economic benefits this application is purported to deliver to the area? Contrarily, the neighbourhood is more concerned by this setting a precedent and adversely impacting a residential area. Can the council provide assurances this will not be the case?
