COMMENTS:

My previous comments remain the same on this application. Barkham is becoming unrecognisable as the village it once was and it's heart breaking. The council is morphing us in to the town with every application to build on our green space that you approve. It has to stop. Barkham used to be alive with animals that you could hear and see at night and seeing a deer was a daily occurrence. With the removal of their homes and habitats you are murdering them.

We do not need any more people in our already over populated area of the country. It's like Noah's Ark, if you build they will come.
