COMMENTS:

Whilst we are not against a new build we unfortunately feel the new designs for the house protrude too far out to the rear. This would mean going out past the rear of our property and could impact our privacy.

We also feel the car parking issue is certainly better but not fully resolved as it would mean blocking cars in, therefore making it less appealing to park on the drive.

We are sympathetic to the knock backs this project has taken and sincerely hope a solution will be found for the owners.
