COMMENTS:

I strongly object. I live immediate next to the development. The noise and disruption during the demolition and early construction phase has been horrendous. Increase in noise, vibrations and construction traffic. It is the norm to increasingly work from home, this is impossible due to noise. Hours of activity have already been submitted and agreed for a reason, they do not need to be extended, making residents lives in the evening and late evening even more disrupted. When do we get peace and quiet, an opportunity to relax and to sleep? Thank you for listening.
