COMMENTS:

This is not the first time that Manor Farm has made retrospective planning applications. It is done so that WBC has a problem with rejecting the application as the work has already been completed. WBC should show that applying retrospectively for major projects is not acceptable & refuse the application. The scale of development on Manor Farm has far exceeded the original approval. Original field boundaries have not been respected, an iconic view has been destroyed, wild life has been ejected, neighbouring residents have lost their privacy & the value of their homes. WBC should be able to say 'enough is enough'.
