COMMENTS:

To Wokingham Council. The proposed applications for fuel depots in Charvil

On the proposed site in Charvil is totally wrong. It is situated near the tyre distribution

Centre opposite from the proposed site. There is heavy traffic using the road in both directions which would not be viable for heavy hgv traffic. It would be a blot on the surroundings area. Another issues of health and safety for adjoining property's would be a major

concern. It would lower the whole outlook of the area. So on that basis I oppose these applications.
