COMMENTS:

i still strongly object to this revised application, nothing has changed.

It's out of keeping and will cause noise and light pollution with the surrounding area.

You need green space between adjoining villages and for the local wildlife to roam/thrive. These houses will cause major stress to the animals and should not push them away.

The local infrastructure is not suitable for this location and I know the ground will not cope with more storm water.

No proper transport or pavements links in the area to reach suitable shops.

These are major reasons and the application must be dismissed. There are others suitable areas where housing should be constructed. why should they be pushed away?
