COMMENTS:

I write to object to the above planning application
I have lived and have family in this location and know the area very well.
It is not sustainable for any development to be constructed here as this is next to a wildlife reserve and putting houses on this would disturb the natural environment.
The area is prolonged to flooding and also the sewage system would be stretched resulting in overflowing into Blackwater river.
No local transport service, no pavements, no shops etc
Also noise and light pollution would cause a greater impact on neighbouring properties and the wildlife.
There is a right place and wrong place for house development, this is the wrong place.
I would say to the planning officer to refuse this application.
