COMMENTS:

My bedroom window overlooks the car park of the Swan. Currently, there is frequent live music which generates a lot of noise until late at night. This has a significant impact on my life at home and my ability to sleep. I have recently invested a huge amount of money to get my windows triple glazed to try and reduce noise. This has had minimal effect. I am concerned that if the new building works proceed, there will be increased live music, traffic and significant noise pollution. I am a single man in my early seventies, with multiple disabilities. I spend most of my time in my home and this situation causes me a huge amount of distress. Thank you for your consideration.
