COMMENTS:

I object to the development on Longwater Road for the following reasons:

The development is not in keeping with the local surroundings, it is located next to a nature reserve where there have been a number of wildlife species identified including bats, badgers, slow worms and barn owls.

The local facilities of Finchampstead village are no longer able to support an increase in population following the loss of the post office and with the strain on local sewage works, childcare and healthcare services.

There is a severe lack of public transport links to the site which will only increase traffic in the area and it's such a fast and dangerous road as it is.

Traffic and schooling in this area is already a challenge.

There is also a significant amount of affordable housing which should be best placed in more town centre with better transport links, schooling and employment.
