COMMENTS:

The planning application appears to show no thought tot the increased urbanisation of the locality, shows no mitigation for increased traffic through Earley and surrounds. Earley and Lower Earley are already highly dense housing areas with limited green space and this proposed development only increases pressure on an already overcrowded borough in a valuable green space. As a local NHS employee I see daily the pressure on our local hospital and the plan does not make clear what mitigation is in place to prevent further pressures on local primary and secondary health services .
