COMMENTS:

Is this plan for real? This industrial madness/plot/plan/site must be away from residential sites, villages, walkways, cycle routes, lakes, beauty spots, baby pram walkways, narrow roads, etc., as the risk is too great. It's just not practical nor fit for purpose at this site/location. There must be other industrial sites it can be rehoused to. Personal comments I agree, but 4 adults in this house vehemently concur with others who quote technical objections. Get it cancelled from Charvil and rehouse it in appropriate risk-free grounds.
