COMMENTS:

1. The sign is already in place and has been used (WBC will have a record of this) the application should be for a Certificate of Lawful Development, not a normal planning application which is for work not yet done.
2. There is no mention of the times the sign can be illuminated.
3. The tick box for "already in place" on the application states no, this should be yes as the application is for the sign and structure, does not matter if on or off.
4. With the base the board appears to be taller than stated in the application.
5. Should there be restrictions around advertising healthy products as per current proposal for bus stops.
