COMMENTS:

Dear Sir/Madam,

Please accept this letter as my formal objection to the planning proposal on the following grounds:

1. Unsustainable - There are no bus services in the village & the nearest railway station is 3 miles away. This will lead to all new residents using cars. This is totally unsustainable. Pressure on the local road network, air pollution and noise pollution will be detrimental to local residents.
2. Visual Eyesore - Design of houses is totally out of character of the local area and will significantly adversely effect the skyline for local residents.
3. Conservation - the current site has a diverse biodiversity and protected species such a Barn Owls are often seen on this areas. Green spaces are a carbon capture and this sets the wrong precedent for building on a greenfield site in the area.

Kind regards,
Albert
