

Supporting Statement – 65 Barkham Ride

This application is for a minor widening of the existing driveway at 65 Barkham Ride. The purpose is to improve access and safety when entering and exiting the property.

The work is small in scale and will not affect any trees, hedges, wildlife habitats, or biodiversity features. No excavation beyond the existing driveway footprint is proposed, and no protected species or ecological areas are present on the site.

This is a simple domestic improvement with no environmental impact.
