COMMENTS:

This letter was written by our 13 year old son who wished to object to the planning application.

Dear Planning Officer,

My name is Koji, I'm 13 years old, and I live at 82 Woodward Close, next door to where the new above-garage extension is planned. I would like to object to this application because it will badly affect my home and where I study.

I am home educated, and I am sitting exams every six months for the next five years, so I spend a lot of time studying at home in my bedroom and in our living spaces. Most of our windows face towards number 81, and if the extension is built, it will block much of the light that comes into these rooms. It would mean that when I'm working at my desk, I'd be looking straight at a brick wall instead of outside, and it would make the house feel darker and more closed in.

The new roof windows also worry me because they would look straight into our house and garden. That would make it hard to relax or work by the window knowing that someone could see in. It already feels quite overlooked, and this would make it worse.

I hope you will please take my comments seriously, because this would really affect how I can study and enjoy being at home over the next few years.

Thank you for reading my letter.

Yours faithfully,

Koji Vasey
