COMMENTS:

Spoken with number 35 again. The garage was being used for family dwelling and in the future will be let out as a separate dwelling. My objection is the waste pipe is already shared between number 35 and 33. Adding a 35b will mean the pipe will constantly be overflowing onto the drive of number 33. Also object to having small dwelling right next to my back room. Noise and people movement will be directly looking into my property. Lack of privacy and general lack of living standards.
