COMMENTS:

I work at the business park that the application is for. This is a 'business park' and is a private estate. An addition of a public undertaking will affect the businesses residing in the park. This being parking, noise and security, affecting all the businesses in a negative way. Plus, traffic will increase tenfold affecting timings coming into the business park and commutes for employees with them having to start their journey earlier in the day in order to get to work on time. Reading Road is already a very busy road, especially with the filter lane being removed several years ago to make way for the bicycle lane.
