: Charvil, Berkshire  
: RG10 9DW  
SUBMITTED BY : Mr Mehar Singh Chauhan  
DATE SUBMITTED : 10/12/2025

COMMENTS:

I have lived in and around this area for the past 10 years and have always enjoyed both the Loddon Nature Reserve and Charvil Country Park. The peace and sounds of local wildlife have been essential for my wellbeing, especially in the midst of a busy life with a young family. Please find the following points for why I object to this application going ahead.

Impact on Local Environment

The site's close proximity to lakes and wildlife habitats means any fuel contamination could seriously harm sensitive ecosystems and protected species. Containment during flooding would be especially difficult.

Safety and Health Considerations

Storing large amounts of fuel near residential areas poses risks in case of fire, explosion, or accidental spills, with potential health impacts from fumes and pollution.

Traffic and Road Safety

Regular movements of tankers and heavy vehicles on narrow, winding roads raise safety concerns for all residents, particularly for children walking towards Twyford and passing the proposed site. As a parent whose children are growing up in this area, I am especially concerned about their safety and wellbeing both now and in the future.

Effect on Community Wellbeing

Extended operating hours and frequent tanker activity could increase noise, light, and fumes, affecting the tranquillity of Charvil and the enjoyment of the Country Park.

Thank you
