COMMENTS:

Please do not go ahead with this. It is completely ridiculous to begin with, more and more of Berkshire are just disappearing under housing. It would also cause enormous disruption and upheaval whilst it is

being built as well, which is likely to take years. We do not want it, and we certainly do not want it. We need to hang on to what is left of our fields and woodlands, not destroy and concrete them over! You should be looking at old disused industrial 'brown field' sites if you really want to go ahead and build something!
