COMMENTS:

I object to the current plans.

I understand the need for more housing. BUT housing should not be erected where there is not enough infrastructure. Doctors Dental schools are some issues current residents are facing. I am particularly struggling to find a sixth form place for my children in the local area.

The main problem I see is the access. The proposed access point is via existing roads. These roads get already congested adding more housing there will not help. Angry commuters speed through housing areas. Parking especially an issue on surrounding roads. On football days this is a nightmare. By adding more houses and not including access point on A33 you are going to make it even more difficult for local people. I Object to this proposal.
