COMMENTS:

As a local resident i object on the grounds that this is far too much green space to be built on which will be devastating for the environment and wildlife in an area that has very much been over built on in recent years. Taking this much green space away where will local wildlife such as badgers, deer, birds, foxes be re-homed to? Shinfield has gone from a nice little village to an area overpopulated with housing estates. There are not the amenities to support local residents as it is, we struggle with doctors, dentist appointments and decent school places. We already struggle with traffic as the roads weren't built with so many residents in mind, this will lead to increased traffic and pollution to the area.

This area also floods terribly so can't see how it would be a good idea to build houses on, its a flood risk.
