COMMENTS:

Adding of dormer style windows on the garage and 1.8 meter garage rear extension will mean that they can see into our garden, take away sunlight and add more shade in our garden. Also adding two windows and sliding doors to the side house extension will take away our privacy completely.

Overall, it will make us feel no secure as the two windows and slide doors on the side of the house can see into our garden and they also align with the garden doors and other windows of our house, so from their proposed Garden room they can see into our living room, dining room and kitchen directly. So, we strongly object with this extension, especially adding windows towards our rear garden. Also, their house is on a higher level than ours by 1.5 metre and also with the windows on the garage and the side of the house we just basically lose all sense of privacy and security. Thank you.
