COMMENTS:

It would be a huge shame to loose yet more green, open space in what is supposed to be the country side. With so much development having taken place in recent years in Arborfield and Finchampstead there is little green space left for people to enjoy and to keep villages apart and this is catastrophic and unsustainable in what is a beautiful place to live. The speed at which villages are sprawling needs to stop before they are lost completely! The density of the proposed development is out of place and not in keeping with the neighbouring houses. The surrounding land to the proposed development is a nature reserve and home to wildlife which should be protected. The noise and disruption from the building works, and the complete loss of the field would be a huge detriment to the wildlife which have nowhere else to go.

Further development within the area puts added pressure on local resources such as schools, doctors and road networks which are already at full capacity.

The site is only accessible by car with no local bus link or public transport services which puts further cars on the roads in the area which is supposed to be peaceful and the countryside.
