Client Richard Easton

Site Address 3 Watson Cl, Finchampstead, Wokingham RG40 4YF, UK

T4 Norway Maple tpo n.o TPO-0819-1996, located on the rear boundary adjacent to Nashgrove lane.

Scope of Works

The tree has become over mature for its location with a height of 10 metres and a crown spread of 8 metres. The western profile of the tree has been pruned to give clearance to overhead services along Nashgrove lane.

The tree is now suppressing the garden and property of 3 Watson Close.

The tree has been historically pollarded and so to keep a balance of the canopy of the tree I advise the tree to be re-pollarded back to the previous pollard points.

Method or Works

The tree canopy will be assessed using rope and harness.

Aerial pruning techniques will be used to dismantle the canopy back to the previous pollard points.

This action will reduce the limbs by approximately 3 metres from the branch tips back to the previous pruning point of the entire canopy resulting in a new crown spread of approximately 5 metres.
